

## Certified for Microsoft Dynamics Solutions

Tested. Proven. Recommended.

### NaviProcess – Certified Solution For Process Manufacturing

NaviProcess for Microsoft Dynamics NAV enables manufacturers to automate and optimize processes and to keep up with ever-changing customer's requirements and industrial practices.

NaviProcess is designed to meet the specific requirements in the process manufacturing businesses such as chemicals / paints, food & beverage, adhesives / plastics, metals, pharmaceuticals and material coatings.

The complete suite of solution encompasses financial management, supply chain management, and specialized manufacturing functionalities such as production planning, raw material replenishment, batch management, recipe formulation, product quality control and computerized control management.

### Catalyse Manufacturing And Supply Chain Processes

The solution comes with highly adaptive configurable business processes and rules for managing and responding to rapidly changing industry and market conditions.

- **Price Configurator**  
Forecast prices; derive production cost and selling price; determine mixing ratio and price mark-up.
- **Recipe Management / Formulation**  
Definer units of measurement by other dimensions such as weight, composition and percentage etc.
- **Mixing and Blending**  
Determine the price of blended products; help to repack blended items and; batch track raw materials and blended items.
- **Document Management**  
Tag QC and relevant documents; track documents at all relevant stages.
- **Lot Control**  
Track drums by parameters such as, customer, location etc.

*"With IBIZ's chemical industry solution built on Microsoft Dynamics, we can now effectively manage formula variations, handle production planning, replenish inventory and simplify quality assurance."*

*Y Bhg Dato' Andrew Ng  
Group MD & CEO  
The Dovechem Group*
